- SvelteKit
- Express
- Material-UI
- Auth.js
- Tailwind CSS
- PostgreSQL
- MySQL
- Firebase
- MongoDB
- Prisma
- GraphQL
- AWS
- Redux
- Jest/Cypress
- Apollo
- Git
- Github Actions
- Docker
- GCP

EXPERIENCE

BUILDASOIL
Full Stack Developer   May 2020 - June 2023

- Developed an in-house ERP system leveraging the MERN stack and Next.js
- Oversaw the deployment of AWS and Vercel for both staging and production environments.
- Utilized project management tools like Jira, Confluence, and ClickUp for team growth, project roadmapping, establishing KPIs and enhancing software efficiency.
- Proactively identified and implemented automation and process improvement opportunities.
- Committed to writing clean, effective, and thoroughly documented code, adhering to industry standards and best practices.
- Integrated third-party APIs and software components, maintaining high code quality and standards, while actively participating in code reviews.
- Implemented box packing and shipping algorithm that resulted in over $100k in annual savings on shipping costs.

EDUCATION AND TRAINING

BACHELOR'S OF SCIENCE: BUSINESS ECONOMICS
State University of New York (SUNY), College at Oneonta, Oneonta, NY   **May 2020**
